NW Children's Foundation
Presents our **2027 Forum**

We invite you to join us as a key partner in the annual NWCF Forum, **Beyond ACEs: The Emerging Science of HOPE for Child Well-being**, taking place virtually on **February 4, 2027**.

Join us for an inspiring virtual Forum exploring the Healthy Outcomes from Positive Experiences (HOPE) framework, **featuring keynote speaker Amanda Winn, MSW, Director of Training at the HOPE National Resource Center**. Grounded in research, HOPE highlights how positive childhood experiences (PCEs), such as feeling safe, supported, and connected, help children heal from adversity, build resilience, and support lifelong health and well-being. Developed at Tufts Medical Center, this approach shifts the public health narrative beyond preventing harm to actively creating the positive environments every child needs to flourish. We'll explore how we can use the HOPE framework to make those experiences more accessible to all children, recognizing that systemic barriers can make them harder for some families to access. Through practical examples from diverse settings, participants will discover how to put HOPE into practice to support children and families while creating a supportive workplace culture that prevents staff burnout and secondary traumatic stress.

The Forum is a unique opportunity to engage with an important and timely topic, and to be recognized by an extensive network of community leaders, child-welfare experts, influential nonprofits, and policymakers. This year's event will be held virtually, and we anticipate an audience of 500+ participants based on past Forums.
